Summary

Web developer focused on backend with frontend experience.
Main technology stack used: TypeScript; NestJS, Express.js, PostgreSQL, Prisma; React, Next.js, Tailwind.

Projects

Course Garden: Web app for creating courses

Role: Full Stack Developer
Stack: TS, React, Zustand, Nest, TypeOrm, Auth0, AWS S3.
Implemented Auth0 authorization. Realized the transition to AWS S3. Enhanced integration with Swagger, and set up file generation from the OpenAPI document. Worked with key features to manage courses and cards. Developed drag&drop functionality, rich text editing, image cropping, quizzes, and custom player. Configured Storybook with its addons.

Bookkeeping app & website for Psychotherapist PO

Role: Full Stack Developer, UI/UX Designer
Stack: TS, Nest, Next, PostgreSQL, Tailwind, Prisma.
Designed and developed web application to manage membership fees and expenses. Build public website with REST API following appropriate design patterns. Applied TanStack Query, React Hook Forms, and Kubb libs. Used Zod for validation, Shadcn for UI components.

Web Developer Portfolio

Role: Full Stack Developer, UI/UX Designer
Stack: TS, Next, Postgre, Drizzle, Tailwind, i18n.
Utilized Next.js as fullstack framework to create responsive website. Customized keen-slider component. Implemented internationalized routing.
